

We know the solutions. Project Drawdown has done the math.  
**IT'S NOT GAME OVER. IT'S GAME ON.**

*Discover the hope, empowerment, and joy that come from driving meaningful change at a time when it is needed most.*

# DRAWDOWN

## DRAWDOWN LEARN LIVESTREAM

### A Solutions-Based Approach to Climate Change

*Paul Hawken, Katharine Wilkinson, Crystal Chissell, Chad Frischmann, and more*

**FRIDAY, OCTOBER 19, 7:30-10pm EDT**

### WHAT IS PROJECT DRAWDOWN?

In 2017, Project Drawdown mapped, measured, and modeled the 100 most substantive solutions to reversing global warming (learn more at [drawdown.org](http://drawdown.org)).

**Now comes a critical next step:** Drawdown Learn, a collaborative effort to develop the tools, training, innovative project-based learning, and other curriculum integration needed to unpack and engage schools and communities in the rich learning opportunities of Drawdown and its data.

This fall, along with Paul Hawken and the Drawdown team, the Omega Center for Sustainable Living and many partner organizations and schools will convene educators, curriculum developers, parents, students, librarians, and community groups to chart a path toward an integrated, solutions-based approach that supports and catalyzes conversations, learning, resource sharing, and connected action around the world.

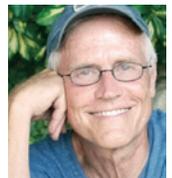

### JOIN US VIRTUALLY:

#### Friday Evening Live Stream

- Overview Presentation with Paul Hawken followed by a panel discussion with the Project Drawdown team, including updates on what's emerged since Drawdown was published last year—the partnerships, ideas, community organizing, Drawdown hubs, and more.
- Friday evening will include time for questions from in-person and online participants and satellite viewing sites.

#### As a Satellite Event Location

- Organize a viewing party or event and invite others from your school, organization, or community.
- Access the free Friday evening live stream featuring Paul Hawken and the Drawdown team.
- Your group can submit questions before and during the Q&A session.
- Organizing a satellite viewing site can be as simple or as involved as you choose.
- Download the satellite organizer's tips sheet and discussion questions or create your own version as you design and facilitate your event.
- Submit your information and we'll link to your organization or group's name, location, or event details from the main event site.
