

We know the solutions. Project Drawdown has done the math.  
**IT'S NOT GAME OVER. IT'S GAME ON.**

Discover the hope, empowerment, and joy that come from driving meaningful change at a time when it is needed most.

# DRAWDOWN

## DRAWDOWN LEARN

A Solutions-Based Approach  
to Climate Change

Paul Hawken, Katharine Wilkinson, Crystal  
Chissell, Chad Frischmann, and more

**OCTOBER 19-21**

### WAYS TO PARTICIPATE:

#### In Person

- Learn more about Project Drawdown and how your school, organization, or community can connect, share, innovate, and get involved with Drawdown Learn.
- Choose from informative and interactive breakout sessions geared toward three areas: community and cross-sector efforts (including youth leadership), K-12, and higher education integration.
- Invite others from your school network, school board, district, or community to join you at this event so you can continue to share ideas and work together afterward.
- Showcase your successes and creative projects in the Drawdown Learn expo area.
- Teachers can earn 15 hours of professional development credit.

#### As a Drawdown Learn Event Partner

- Join a growing number of organizations and schools that are helping shape, support, and spread these conversations and shared efforts.
- Choose to have your organization or school listed on the event website so others can see you as part of this event and emerging Drawdown Learn network.

#### Register As a Satellite Event Location

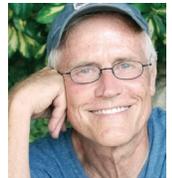

- **On Friday 10/19 7:30-10pm EDT:** Join us by hosting an informational event in your community, at your school, or within your organization with the free live stream featuring Paul Hawken and the Drawdown leadership team. We'll link to your event details from the main event page.
- Satellite groups will be able to ask questions before and during the interactive Q&A session.

### WHAT IS PROJECT DRAWDOWN?

In 2017, Project Drawdown mapped, measured, and modeled the 100 most substantive solutions to reversing global warming (learn more at [drawdown.org](http://drawdown.org)).

**Now comes a critical next step:** Drawdown Learn, a collaborative effort to develop the tools, training, innovative project-based learning, and other curriculum integration needed to unpack and engage schools and communities in the rich learning opportunities of Drawdown and its data.

This fall, along with Paul Hawken and the Drawdown team, the Omega Center for Sustainable Living and many partner organizations and schools will convene educators, curriculum developers, parents, students, librarians, and community groups to chart a path toward an integrated, solutions-based approach that supports and catalyzes conversations, learning, resource sharing, and connected action around the world.
