Omega to Hold Conference:
Autism Through the Life Span II

Cosponsored by The Center for Discovery’s
Environment and Health Institute

RHINEBECK, NY – For the second consecutive year, Omega Institute will host an important conference at its Rhinebeck campus August 15-17, for professionals and families managing autism spectrum disorders, to explore the latest research and development in treating and living with autism. The number of children diagnosed with autism every year is increasing at an alarming rate; the disorder now affects one in every 150 children according to the Centers for Disease Control and Prevention. Omega Institute’s rare gathering will feature some of the nation’s most innovative voices in the autism community.

“As an organization committed to a holistic approach to healing, Omega is deeply gratified to partner with The Center for Discovery to bring new insights and resources to those working or living with autism,” said Carla Goldstein, director of external affairs at Omega.

“By approaching healing from many angles, including those outside the traditional medical model, we can learn how to improve the overall health of individuals and society,” said Goldstein.

This year the conference offers a professional training that is open to those working in the field of autism as well as family members of those with autism.

The program will provide the latest information to professionals working in the medical, nutrition, therapeutic and mental health fields. It will also focus on the diagnosis, alternative approaches to treatment and therapy, and insights into working productively with families. Family members will learn ways to better care for themselves and their entire family, while caring for an individual with an autism spectrum disorder, and how to navigate the autism advocacy landscape.

CE credits are available. To register please call 800.944.1001 or visit eomega.org.
Conference faculty:

Mark Hyman, MD, is editor in chief of *Alternative Therapies in Health and Medicine*, the most prestigious journal in the field of integrative medicine. He also is the coauthor of several books, including the *New York Times* best-selling book, *Ultraprevention: The Six Week Plan That Will Make You Healthy for Life*. His latest book is *The UltraMetabolism Cookbook*. [drhyman.com](http://drhyman.com)

Sally Pederson served as lieutenant governor of Iowa from 1999 to 2007. Before her years in public office, Pederson spearheaded the creation of The Homestead, an agency providing innovative solutions to the challenges facing children and adults with autism.

Martha Herbert, MD, is assistant professor in neurology at Harvard Medical School, a pediatric neurologist at Massachusetts General Hospital, and a brain development researcher specializing in neuron-development disabilities, particularly autism. [marthaherbert.com](http://marthaherbert.com)

Sidney Baker, MD, received the prestigious 1999 Functional Medicine Linus Pauling Award at the Sixth International Symposium on Functional Medicine. The author of several scientific papers and books, he is a practicing physician with an interest in nutritional, biochemical, and environmental aspects of chronic illness.

Theresa Hamlin, EdD, is chief of staff for the Center for Discovery, and oversees its program operations, management, curriculum design, and program evaluation. For the past 24 years, she has been developing and directing programs for the promotion of development and health for children and adults with developmental disabilities, including those with autism spectrum disorders and severe multiple disabilities.

Valerie Paradiz, PhD, is a writer and cofounder of the Open Center for Autism and the ASPIE School Program. Her work developing pioneering educational programs for children with autism spectrum disorders has been featured in the *New York Times*, *Redbook*, *The Guardian*, and *Autism Spectrum Quarterly*. She is the author of *Elijah’s Cup: A Family’s Journey Into the Community and Culture of High-Functioning Autism and Asperger’s Syndrome*. [valerieparadiz.com](http://valerieparadiz.com)
