Y12SR: The Yoga of 12-Step Recovery

The Leadership Training

Nikki Myers, Yoga Therapist, Somatic Experiencing Practitioner, Certified Recovery Specialist, MBA
Y12SR: The Yoga Of 12-Step Recovery

**Created in 2003: 6-week class**

**Grassroots Evolution:**
- Weekend intensive for 12-step and Yoga Practitioners
- Weekly classes
- Space holder leadership training

**Vision:**
- Y12SR meetings as pervasive as other 12 step meetings
- Y12SR adopted as recognized intervention for addiction recovery

60+ meetings held throughout U.S., International presence: Canada, London, 152 active Leaders, more than 550 trained Leaders

Y12SR foundation: fiscal sponsorship agreement with Off The Mat, Into The World (OTM)

Y12SR Research: work toward evidenced-based study

Y12SR Treatment Center Initiative

Recovery 2.0 and Y12SR Alliance

New Y12SR Offering: Transforming the Samskara Of Co-Dependency

Inaugural Leaders Retreat
What is it?

- Relapse prevention program: Based in YS 2:16
- 12-step based addiction recovery model coupled with yoga philosophy and practices that weave together the ancient wisdom of yoga with the practical tools of the 12-step programs.
- Open to anyone dealing with their own addictive behavior or affected by the addictive behavior of others.

What it is not...

- A replacement for meetings, sponsor, or any other part of the 12-step program

Why a leader training?

- To engage and equip space holders as meeting facilitators
OBJECTIVES

To engage and equip Y12SR space holders

- Explore addiction and recovery within the mind/body continuum
- Examine techniques and distinctions that aid in healing and help avoid pitfalls and traps
- Experience group exercises designed to ground us in holding space
- Develop resources for creating self-sustaining Y12SR groups
- Investigate building a themed yoga practice for the recovery population
Agenda

Part 1: Foundation

Practice, context set, ground rules

Intros

Overview:
- Addiction and it’s characteristics
- 12-steps and spiritual principles
- Yoga philosophy and it’s correlation to the steps

The Neurobiology and Physiology of Trauma

Samskara
AGENDA

Part 2: Core

- Resourcing and Support
- The Y12SR Interventions
  - Embodiment Concepts & Practices
  - Building a Themed Yoga Practice

Part 3: Expression

- Distinctions
- Recognizing Traps
**Ground Rules**

**Foundation of creating and holding sacred space**

**Confidentiality:**
- what’s said/done here stays here
- okay to talk about your experience; don’t put a name with it

**Allow everyone to have their own experience - refrain from the tendency to fix, manage, control or advise**

**Please be on time**

**Stay away from sexual advancement or relationship with anyone that you didn’t come with**

**All voices are welcome. AND... part of sharing is sharing time.**

**More?**
INTROS

Please share:

- Three things that are important to you
- How addiction has affected your life; your experience with yoga and/or 12-step programs
- Your intention for being here

After sharing, we breathe together. Introducing The Breath Diva or Dude.
God, grant us the serenity to accept the things we cannot change, the courage to charge the things we can and the wisdom to know the difference.
The Serenity Prayer

God, grant me the serenity
Awareness, connection with something bigger

To accept the things I cannot change,
Acceptance, foundation, turning the vessel right side up

The courage to change the things I can
Action, core, preparing the vessel for sail

And the wisdom to know the difference.
Let go, expression, set sail on spiritual voyage

Information vs. Experience

“I know”

“What the hell does ‘I know’ have to do with it?”
The Dis-ease and neurobiology of Addiction
DISEASE

Disease Process - ‘a definite morbid process having a characteristic chain of symptoms. It may affect the whole body or any of the parts, and its etiology (cause), pathology and prognosis may be known or unknown.’ - Diland’s Medical Dictionary

Two Basic Categories:

- Infectious - contracted from outside (bacteria, fungi, viruses)
- Chronic - long lasting conditions that can be controlled but not cured
  - With chronic ailments, disease symptom is just the surface
Addiction: Clinical Definition

Addictions and compulsions are destructive behaviors that an individual acquires as a method of coping with the pressures of life. Some addictions have genetic components and are passed down through biological families. Alcohol and drug addictions are examples of genetic conditions. Addictions can be linked to survival reactions in response to family trauma.

Sex addictions and eating disorders can have roots in emotional, physical, or sexual abuse. Addictions such as overwork, gambling, overspending, smoking, and compulsive exercise appear to be the result of bad habits. Most addictive behaviors are maladaptive responses to unresolved trauma.

Communication In The Brain

Here's how brain cells communicate.

Sender Neuron

Synapse

Neurotransmitter

Receptor

Receiver Neuron
Drugs In the Brain

ALL DRUGS OF ABUSE TARGET THE BRAIN’S PLEASURE CENTER

Brain reward (dopamine) pathways

These brain circuits are important for natural rewards such as food, music, and art.

All drugs of abuse increase dopamine

Typically, dopamine increases in response to natural rewards such as food. When cocaine is taken, dopamine increases are exaggerated, and communication is altered.

Source: NIDA (National Institute of Drug Abuse)
**The Reward Center of Brain**

**Activation of Reward Circuitry in Brain**

- **Signal sent from cortex to VTA (cognition, motivation)**
- **VTA sends dopamine to:**
  - **Nucleus Accumbens (motivation)**
  - **Prefrontal Cortex (executive functions)**
  - **Septum (navigation and sensory motor functions)**
  - **Amygdala (decodes emotions, especially fearful stimuli)**

**Brain Learns:**
- **Important event**
- **Remembers event**
- **Teaches us to repeat**

Characteristics of Addiction

- Dishonesty (denial, projection, delusion)
- Not processing feelings in a healthy way (distortion, frozen feelings)
- Need to control, rigidity, fantasy
- Loss of personal morality (compromised value system, loss of spiritual base)
- Fear, depression, self-centeredness, negativism
- Thinking disorder (ego-orientation, obsessive thinking, linear thinking, over-reliance on logic & analysis, etc.)
- Perfectionism, inferiority/grandiosity
- Judgmentalism, external referencing, attention/approval seeking
A Solution
The Steps, The Traditions & Spiritual Principles

The Steps: Bring us into ‘right alignment’ in something greater than ourselves

Steps 1 - 3: Foundation: Turning the vessel right side up
1. We admitted we were powerless over ____ and that our lives had become unmanageable.
2. Came to believe that a power greater than ourselves could restore us to sanity.
3. Made a decision to turn our will and our lives over to the care of God as we understood God.

Steps 4 - 9: Core: Preparing the vessel for sail
4. Made a searching and fearless moral inventory of ourselves.
5. Admitted to God, to ourselves and another human being the exact nature of our wrongs.
6. Were entirely ready to have God remove all these defects of character.
7. Humbly asked God to remove our shortcomings.
8. Made a list of all the persons we had harmed and became willing to make amends to them all.
9. Made direct amends wherever possible, except when to do so would injure them or others.

Steps 10 - 12: Expression: Set sail on the spiritual voyage
10. Continued to take personal inventory and when we were wrong promptly admitting it.
11. Sought through pray and meditation to improve our conscious contact with God, as we understood God, praying only for knowledge of God’s will for us and the power to carry it out.
12. Having had a spiritual awakening as a result of these steps, we tried to carry this message to _____ that still suffer and to practice these principles in all our affairs.

The Steps, The Traditions & Spiritual Principles (cont’d)

The Traditions: Bring us into harmony with ourselves and those around us

The Spiritual Principles: Inspire positive behavior, shift attitudes, promote love

- Awareness
- Honesty, Open-Mindedness, Willingness (HOW)
- Acceptance, gratitude
- Surrender
- Hope, Faith and Trust
- Self-acceptance, humility
- Compassion, patience, and tolerance
- Forgiveness
- Unconditional love
- Sharing, caring and service
A Little History

Founded of AA Dr. Bob and Bill W.

Formed in 1935

“The generally accepted story is that the steps came to AA via the Oxford group of the Theosophical Society, who developed them by systematizing teachings of the rishis (saint, sage, yogi) of India.”

From ‘Addictions a Systems Approach published @ www.yogamag.net
THE ART AND SCIENCE OF YOGA
Yoga

“Ancient art and science of self-development that teaches people the fine art of balancing our multi-dimensional lives while living in a complex world.” Yoga for wellness - Gary Kraftsow

English translation - union, balance, integration, relationship

More than well-being in our bodies, yoga is a path toward deeper meaning and healing in our lives.
Characteristics of Addiction

- Dishonesty (denial, projection, delusion)
- Not processing feelings in a healthy way (distortion, frozen feelings)
- Need to control, rigidity, fantasies
- Loss of personal moral integrity (promised value system, loss of spiritual base)
- Fear, depression, self-centeredness, negativism
- Thinking disorder (ego-orientation, obsessive thinking, linear thinking, over-reliance on logic & analysis, etc.)
- Perfectionism, inferiority/grandiosity
- Judgmentalism, external referencing, attention/approval seeking
Mind, Body, Spirit

H₂O Substance as different forms

Solid - Ice - Body  Liquid - Water - Mind  Gas - Vapor - Spirit
Panchamaya Kosha Model

The Ideal Condition Of the Human System: An Integrated Whole

Annamaya – physical
Pranamaya – energy
Manomaya – thinking
Vijnanamaya – character
Anandamaya – heart
The Multi-Dimensional Self

When the bodies are misaligned, disconnected or imbalanced the system is susceptible to disease and dysfunction.

“Hell is the place where nothing connects.”

T.S. Eliot
Roots of Disconnection

Kleshas – conditioned beliefs and behaviors that keep us bound, separate

Dvesa – avoidance, refusal, rejecting things, dislikes, ‘I don’t wanna’

Raga – attachment, craving, likes, ‘gotta haves’

Abhinivesa – fear

Asmita – ego, constructed Self

Avidya – incorrect comprehension, false understanding

Adapted from ‘The Heart of Yoga’, T.K.V. Desikachar
MANIFESTATION OF THE OBSTACLES

- Sickness, disease
- Density, stuck-ness
- Doubt, undermining the potential to move forward
- Carelessness, hastiness
- Lethargy, lack of passion
- False perception of self
- Self-importance/low self-esteem
- Instability, falls back
- Not grounded; not achieving level anticipated

THE NEUROBIOLOGY AND PHYSIOLOGY OF TRAUMA

COPYRIGHT 2010 © Y12SR
The Triune Brain
**ANS (cont’d)**

Regulates all basic life functions including visceral system (internal organs). ANS is regulated by the reptilian brain.

- The PNS branch acts like a brake pedal for nervous system. It relaxes, unwinds, and discharges the arousal of sympathetic activation.
- The SNS is like the gas pedal. It energizes for any action, and prepares for threat.
- A dysregulated ANS is like a car driven with the brake and accelerator fully engaged.
Healthy Nervous System

A Healthy Nervous System

sympathetic

arousal-activation

settle

parasympathetic

Normal Range

Courtesy: Somatic Experiencing Trauma Institute

Copyright 2010 © Y12SR
**Balanced Nervous System**

When my Nervous System is balanced and my activation is low, I feel:

- Open, curious
- Embodied
- Available for connection
- Fluid, resilient
- Competent - a sense of mastery
- Healthy - symptoms are manageable

**I have choices and options**

- I recognize when I am moving out of my functional range and have tools to return to stability and stabilization
- I know when to reach out for support when I can't do it on my own

*Courtesy: Somatic Experiencing Trauma Institute*
Nervous System Dys-regulation

Symptoms of Un-Discharged Traumatic Stress

- Anxiety, Panic, Hyperactivity
- Exaggerated Startle
- Inability to relax, Restlessness
- Hyper-vigilance, Digestive problems
- Emotional flooding
- Chronic pain, Sleeplessness
- Hostility/rage

Depression, Flat affect
Lethargy, Deadness
Exhaustion, Chronic Fatigue
Disorientation
Disconnection, Dissociation
Complex syndromes, Pain
Low Blood Pressure
Poor digestion

Stuck on “On”

Stuck on “Off”
TRAUMA

‘On a broad level, trauma is anything from one’s life experience that remains trapped and unresolved causing disturbances at the biological, physiological, emotional, mental or behavior levels’

‘Traumatic events challenge and overwhelm our capacity to cope and respond physically and/or emotionally’

‘Waking the Tiger’ - Peter Levine
**Traumatic Events**

**Shock trauma AND Developmental trauma**

**Traumatic Events:**

- Physical or sexual abuse, car crashes, accidents, surgical procedures, life-threatening illnesses, falls, sudden and unexpected losses, drowning and suffocation, birth trauma

**Risk Factors for Childhood Trauma:**

- Divorce, death or serious illness of family member, hospitalization or medical procedures placement in foster home, being attacked, natural disasters, exposure to violence, drastic changes in social-economic status, immigration, learning disabilities.

‘Waking the Tiger - Peter Levine’

Copyright 2010 © Y12SR
The Body Bears The Burden

“All bodies record the physical and emotional traumata of living – the happenings of life” - Ida P. Rolf

- Emotional trauma is energy.
- Energy collects somewhere
- Creates knots and tension
- “The issues live in the tissues”
Indications Of Unresolved Trauma

Intense emotions drive reactions

Capacity to self-regulate is damaged. Responses are often reflexive and impulsive

Capacity to reason and process information diminishes

Difficult to maintain self-control

Gina Ross 2007
Nervous System Regulation

The nervous system:

- no understanding of time
- wants homeostasis

To self-regulate we will:

- drink, drug, smoke, overeat, numb out on TV, engage in inappropriate sex, shop, gamble, etc., etc., etc.

The practices of yoga and the practical tools of the 12-step program help us manage our states in sustainable non-destructive ways rather than destructive ones
Yes! The Issues Live In Our Tissues
**Samskara**

- From Sanskrit sam (completed or joined together) and kara (action, cause, doing)

- Habitual conditioning

- Innate tendencies that can be of anything, not just the mind

- Inborn, acquired, and imposed

- Repeating samskaras reinforces them, creating a groove that is difficult to resist

- Tamasic, Rajasic, Sattvic
Communication In The Brain

Neurobiology of Samskara

Sensory Access Points (SAP's)

Hands: steering wheel
Nose: tires, gas, tree
Lips/Face: impact forces
Hearing: gears, crash,
Eyes: glass, blackness, road
Proprioceptors: foot/hand/head position, impact points

Neural Impulses translated from SAP's

Perception Filters (Metadata)

Neocortex

Connective Tissue

Information passed into connective tissue: thermally, chemically, acoustically, hydrodynamically, biophonotonically

Truth of Experience: “What is’
Connective Tissue

How is it possible that our issues are stored in connective tissue?

- Connective tissue is often referred to as extracellular matrix (ECM)
- ECM surrounds and supports every cell in our body
- The foundation of ECM is collagen

Properties of Collagen:

- Highly organized, crystal-like triple helix
- Piezo electric (voltage changes with manipulation)
Truth of Experience: “What is’

**Sensory Access Points (SAP’s)**

Why Yoga?

Yoga works with the language of the body to release the information that is held in tissues

Homeostasis based

Yoga circumnavigates the ahankara

Works with consciousness - awareness, attention, self-reference
The Wisdom To Know The Difference

The Cities

Author: Gary Kraftsow
The Inner City

- Thought
- True Self
- Mood
- Behavior
Y12SR: Leadership Training
Part 2: Core
Embodiment Concepts, The Y12SR Interventions, Practice
Embodyment Concepts

Felt-sense: language of body. Felt sense informs us instantly and simultaneously our external and internal environment. Examples: (the knot in the belly when something feels scary, butterflies when excited, strength in arms and legs when confident)

Orienting Response: behavior of an animal when it experiences novelty to environment

Grounding: using 5 senses to return to present

Resourcing: anything that connects us with a deeper capacity for organization, bridge to deeper connection. Internal and external anchors to feel less activated.

Meet the Energy Where It’s At
Embodiment Concepts

Meet the client/student where they are:

- **Anxious:** start with vigorous practice and move toward more relaxation

- **Depressed:** start with relaxation and move toward deeper movement

- ‘Empathetic resonance’
Y12SR Interventions (Embodiment Practices)

- Keep Coming Back - Mountain Pose, Breath work
- Pause Button - child’s pose
- Foundation, Core, Expression
- Serenity Prayer - Wisdom to Know the Difference, knowing when to do more, knowing when to stop.
- Repetition and Stay - ex: Lunge and Warrior
  - Repetition: helps to re-educate neuromuscular patterns
  - Stay: works with Physiology and Psychology
  - EX: Lunge and Warrior
- 5 Body Presence - centering and meditation, am I hungry, angry, lonely, tired, Stuck, lethargic, scattered?
- Practicing The Principles in All our Affairs - Yoga and 12 Steps are principle centered practices
- Life on Life’s Terms - Ex: Pigeon
- Dual Action - hug in, reach out; open and strengthen
- TPM: Through Prayer and Meditation - Tonglen
**Breath and Meditation**

**To Reduce Craving:** Inhale through left nostril, retain as long as possible, then exhale right.

**To Change An Agitated State of Mind:** Notice dominant nostril and breath through opposite.

**To Overcome Anxiety:** Palms together at heart center, thumbs pressed against sternum. Eyes lightly closed, focus between eyebrows. Inhale through nose in 4 equal parts like sniffs. Exhale in 4 equal parts, powerfully pulling in naval point. To end, inhale deeply and press palms together with maximum force for 10 seconds; then exhale. Relax for 15 to 20 seconds. Repeat sequence twice more.
Let’s Practice.......
Building The Yoga Practice

Moments of a Theme

Centering/Turning Inward
- Relax and ground students using breath awareness
- Introduce theme or emphasis - use image or phrase that can be repeated and/or elaborated on throughout the class

Standing Postures or Part of Class Requiring Most Concentration
- During the most active part of the class bring the theme into the room by using one word or phrase, finding the breath pauses during the intense time to repeat the theme

Slowing Down
- Repeat the theme during transition to floor.
- Use examples and stories from every day life. This the part of class when the student is usually open for suggestion.

Final Moments of Class
- Here we speak about the theme from our heartfelt connection to it. Imagery, poetry and making subconscious connections conscious work here.
**Challenge:**

**Emotional Struggle**

**Riding the Wave**

- **Breath** - slow process down, ask person to connect with breath (resource)
- **Relax** - help the person relax in knowing that they are safe
- **Feel** - invite person to feel their own feelings at the level of sensation (felt sense)
- **Watch** - invite the student watch and notice what happen next
- **Allow** - ask them to just pause, allowing their HP to work and notice if something moves or changes

Y12SR
Leadership Training
Part 3: Being a Vessel
Distinctions, Recognizing Traps, Co-Dependence, Boundaries, Resources
DISTINCTIONS

When there is confusion, there is an impediment to holding space...

- Empathy - Pity
- Vulnerability - Control
- Responsibility - Victim
- Powerless, Powerful, - Empowered
- Surrender - Resignation
- Witness - Fix
- Listening - Interpreting
Recognizing Traps

- Projection
- Transference
- Countertransference
- Spiritual Bypass/Arrogance
- Boundaries
Co-Dependence

- A pattern of dependence on compulsive behaviors and approval from others in an attempt to find safety, self-worth and identity.

- A primary disease present in every member of an addictive family, often worse than the disease itself, with its own physical manifestations.

- A pattern of coping which develops because of prolonged exposure to and practice of dysfunctional family rules that make open expression of thought and feeling difficult.

- Problematic or maladaptive pattern of relating characterized by a lack of open expression of feelings and excessive attempts to derive a sense of purpose, identity, self-worth and fulfillment through engaging in care taking relationships which involve high levels of denial, rigidity and attempts to control the relationship.

Co-dependence

Five Core Symptoms:

Codependents have difficulty:

1. experiencing appropriate levels of self-esteem; self-love

2. setting functional boundaries; self-protection

3. owning and expressing their own reality; self-identity

4. taking care of their adult needs and wants; self-care

5. experiencing and expressing their reality moderately: self-expression

Based on work of Pia Mellody

Copyright 2010 © Y12SR
Boundaries

Boundaries - invisible and symbolic ‘force fields’ to:

- Keep people from coming into our space and abusing us
- Keep us from going into the space of others and abusing them
- Give each person a way to embody our sense of ‘who we are’
Two Kinds:

**External Boundaries** - allows us to:
- choose our distance
- give or refuse permission to touch us or our private property
- keep our bodies from offending someone else’s body

**Internal Boundaries** - protects our:
- thinking
- feeling
- behavior
**Boundaries**

- **None**
- **Walls**
- **Damaged**
- **Intact**

Based on work of Pia Mellody
